

Announcing Shurtape PE 444: Industrial poly-film tape for demanding indoor/outdoor applications.

Shurtape's new PE 444 poly-film tape is the solution for indoor and outdoor stucco and masking applications – no matter how demanding. Only Shurtape offers a film tape with ultra violet (UV) inhibitors to protect your project from the sun's damaging rays. And thanks to its special synthetic high-tack adhesive, Shurtape PE 444 provides a watertight seal even in the most severe environments and weather conditions. Despite its high tack, PE 444 removes cleanly with no residue. The quick clean up will help you cut back on man-hours and costly cleaning materials.

With the addition of PE 444, Shurtape now offers a full line of indoor/outdoor industrial-grade stucco masking products. Ask your representative which tape is right for you: PC 622, PC 667, PE 555 (formerly VP 555) or PE 444.

PE 444 is perfect for masking windows and doors for stucco applications. Its easy-unwind and conformability make it ideal for general purpose uses. And it's designed to work on non-painted surfaces such as wood, vinyl, metal, tile and other synthetic surfaces. To provide easy visibility in the field, PE 444 is bright red in color.
