

NON-UV

STUCCO MASKING TAPE

Some stucco applications don't require UV-resistance; just a hard-working tape that can sustain the harsh scraping of a trowel. It's why Shurtape formulated its PE 333 to be strong and durable, yet non-UV for jobs that don't demand prolonged exposure to sunlight. So, you get the surface protection you need, without the added expense of features you don't need.

PE 333 is easy to unroll and apply, and features a serrated or straight edge. Conformable and highly visible, this stucco tape is ideal for masking windows and doors in stucco applications to create a watertight seal. When the work is done, PE 333 removes cleanly and easily, without leaving behind a residue or damaging surfaces.

PE 333
