

EASY ON LINES. EASY ON OPERATORS.

You know how time-consuming and costly tape roll changeovers can be. Even the slightest interruption to production can have a negative impact on your line efficiency and ultimately your bottom line. That's why Shurtape® has expanded its ShurSEAL Automated Packaging Solutions offering with a quick change system that combines Shurtape HP Series packaging tape with a revolutionary PrimeLoc™ tape applicator that's engineered to tackle slow tape roll changeovers...because there's just no time for downtime.

QUICK CHANGE SEALING SYSTEM

SAVE TIME. SAVE MONEY.

In fast-paced, high-volume manufacturing environments, there's no time for downtime. So, we've built upon ShurSEAL technology to create an innovative sealing system that puts an end to laborious tape roll changeovers that slow production, place unneeded stress on operators and keep lines from running at peak production.

When uptime matters, the Quick Change Sealing System gets the job done in seconds, and delivers the same secure seal you demand.

SATISFACTION
GUARANTEED**

OUR PROMISE TO YOU

If you are not 100% satisfied with the quality or performance of The ShurSEAL Solution, notify us and we'll refund any difference in price compared to your previous supplier.

KEEPS LINES RUNNING

When it's time for a change, simply remove the empty insert and replace it with a second, pre-threaded insert - in as little as 10 seconds. For added efficiency, the interchangeable inserts are universal to the top and bottom units, so there's no need to store extra pieces.

REDUCES ERRORS AND FRUSTRATION

The threading process is easy, safe and completed offline. This affords operators more time to thread the tape roll correctly, while reducing the stress associated with replacing tape rolls as quickly as possible to minimize downtime.

ELIMINATES STRAINING AND LIFTING

The inserts are up to 60 percent lighter in weight than traditional tape applicators, so it's easy to complete changeovers without excessive lifting or straining.

DELIVERS SECURE SEALS

There's no sacrifice of seal quality - the Quick Change Sealing System offers the same HP Series packaging tape, unmatched wipe-down force and Folded-Edge Technology as the original ShurSEAL Solution. Plus, it's available in all standard configurations, including 2-inch, 3-inch and side mount, and easily retrofits to existing packaging equipment.
