

SAME TAPE. EASIER LINER.

AF 100 with EasyPEEL® split liner technology is the same UL 181A-P/B-FX Listed aluminum foil tape you know, now enhanced with a crack and peel release liner that offers a smooth start for a fast finish.

The quick, hassle-free liner is easy to start every time off the roll – even when wearing work gloves – to save you time and money on the job.

Still not convinced? See what HVAC pros are saying about AF 100 with EasyPEEL:

“Excellent tape! I don’t find any cracks. Very easy to peel and stick to metal surfaces. We use it on almost everything, from ductwork and pipes to joints and seams. We sealed all joints and seams and found no leakage – amazing.”
– Barry C.

“Easy to use. No break in seals. Love how easy I can get it off the roll.”
– Emily P.

“Quicker and less frustrating than the traditional liner. The guys asked to switch to this as our primary foil tape.”
– Carl R.

“I always used to find it a struggle to get the liner off the back of the tape. It seems to make my sealing job frustrating and even more time consuming, and almost impossible when I wear gloves. I love the EasyPEEL liner. It makes it so much easier to use the tape. Never a problem removing the liner now. I look for it whenever we restock, and I am disappointed whenever someone hands me something different to use.”
– Dan M.

“Easier to use, less time consuming, and less waste.”
– John T.

“Quicker tape time means jobs completed faster. Less time on jobs equals more profits.”
– Clinton K.
