

WATER RESISTANT GAFFER'S TAPE

For demanding applications that require clean removal* and water resistance, Shurtape® P- 665W water resistant gaffer's tape delivers. Designed for use in the audio/visual, television, photography, theatrical and motion picture industries, P- 665W is made with an aggressive adhesive and is hand-tearable and conformable, making it ideal for a range of jobs, including holding wiring, lighting and props.

WATER RESISTANCE VS. THE COMPETITION

The standard Penetration Test (ASTM 3816), which demonstrates water resistance qualities, was performed on the P- 665W. After a 5 day water submersion, the P- 665W absorbed 50% less water compared to competitive gaffer's tapes.

Note modified testing:
ASTM 3816 - submerged in water for 5 days instead of 48 hrs.

*Test tape on an inconspicuous area before using

P- 665W
