

PRODUCT PORTFOLIO

LR 117B

30 mil, all-weather linerless rubber tape that is compatible with all extruded dielectric cable insulations, is rated for insulating splices and terminations in wires and cables up to 69,000 V, and has an emergency overload capacity of 130 C. High voltage LR 117 is a self-bonding, highly conformable and UV-resistant electrical tape that delivers high stretch capabilities to form void-free moisture seals when creating splices.

EV 77C

Professional grade, 7.0 mil, all-weather vinyl tape used for color-coding and phase identification in electrical applications in temperatures ranging from 0 F to 220 F. UL Listed and CSA Approved, EV 77C colored electrical tape is lead free, flame retardant, and is highly conformable to deliver a moisture-tight seal, even in extreme temperatures.

PC 6

Economy grade cloth duct tape for gooseneck, non-critical and general use applications, including sealing, wrapping, binding and bundling. PC 6 is a 6.0 mil duct tape that offers good conformability and easy handling to prevent it from twisting or curling during application.

FT 175

General purpose friction tape for insulating and wrapping electrical splices and connections. FT 175 is a cotton cloth grip tape offering excellent adhesion, exceptional tensile strength and good abrasion resistance for a range of electrical and mechanical jobs.

EV 97B

Premium grade, 8.5 mil, all-weather vinyl tape used for insulating electrical splices up to 600 V, as a jacketing on high voltage splices and repairs, and can also be used when wrapping wire harnesses and cables. EV 97B is UL Listed, CSA Approved, lead free and flame retardant, and is a highly conformable tape that delivers a moisture-tight seal in temperatures ranging from 0 F to 220 F.

EV 57B

General purpose grade, 7.0 mil vinyl insulation tape for use in a variety of mechanical and electrical applications. UL Listed and CSA Approved, EV 57 is a highly conformable, lead free and flame retardant electrical tape for use indoors and out.

PC 9

Contractor grade cloth duct tape featuring aggressive adhesive and cold temperature performance for sealing, seaming, repairing, holding and waterproofing applications, as well as for tasks in the restoration industry, such as holding poly-sheeting. A co-extruded, repair duct tape, 9.0 mil PC 9 provides superior adhesion with quick stick; excellent holding power for indoor and outdoor use; and easy tearability to finish jobs with speed and ease.

BT 100

Non-adhesive barricade tape for marking restricted areas and managing access to work sites by professionals in the safety, construction, utilities, hardware and other industries. BT 100 features 2-inch letters that are easy to read, is resistant to moisture and humidity and resists sagging for long-term use, even when stretched over long distances.

EV 77B

Professional grade, 7.0 mil, all-weather vinyl insulating tape used for electrical and mechanical protection in temperatures ranging from 0 F to 220 F. UL Listed and CSA Approved, EV 77 electrical tape is lead free, flame retardant, and is highly conformable to deliver a moisture-tight seal, even in extreme temperatures.

EV 57C

General purpose grade, 7.0 mil vinyl insulating tape for use in a variety of mechanical and electrical applications, including color-coding and phasing tasks. EV 57C is UL Listed and CSA Approved, and is a highly conformable, lead free and flame retardant colored electrical tape for use indoors and out.

PW 100

General purpose grade, 10.0 mil PVC tape for use on under and above ground pipe installations. PW 100 pipe wrap tape offers excellent moisture resistance and conformability to protect metal and plastic piping.

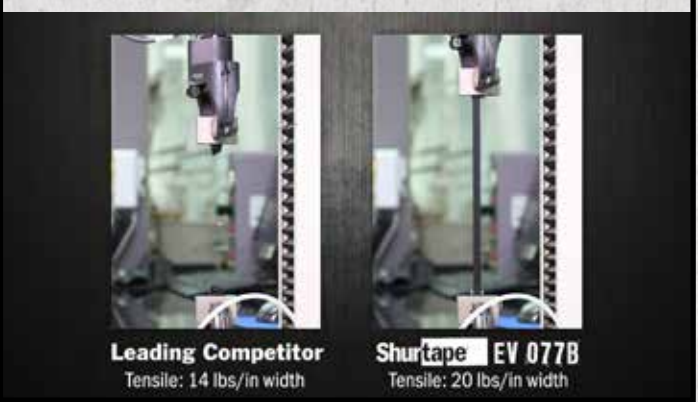

TAPES FOR THE ELECTRICAL INDUSTRY

Shurtape®
TRUE TO YOUR WORK®

PERFORMANCE RIGHT DOWN TO THE WIRE

Feel the Quality. Trust the Performance. Shurtape electrical tapes are engineered with the physical attributes demanded to perform at or above the industry standard to deliver superior results with each and every use.

TENSILE

WHY IT MATTERS:

The greater your tape's tensile strength, the more you can stretch it and not have it break. In certain electrical taping applications, wrapping tightly is critical.

STRETCH

WHY IT MATTERS:

A tape with high stretch properties, combined with high tensile strength, allows you, the contractor, to wrap splices extremely tightly and efficiently. This ensures a tight seal around any splice.

RESIDUE

WHY IT MATTERS:

No one likes dealing with sticky electrical tape residue, especially in extreme weather conditions. Or on temporary jobs, such as phasing, where residue can not only make your wire and tape much more difficult to work with, but can also mar your customer's work surfaces. Shurtape electrical tapes are designed with a specific adhesive formula and quantity so as not to gum up the job like other leading tapes.

ADHESION/EDGE TACK

WHY IT MATTERS:

If the adhesion to backing is too great, the tape can be harder to get off the roll. Shurtape electrical tapes are designed with a level of adhesion to backing that makes them easy and smooth to get off the roll.

ELECTRICAL WORK DEMANDS DURABILITY, RELIABILITY AND SUPERIOR RESULTS. THAT’S WHY SO MANY CHOOSE TOOLS THAT ARE BUILT FOR STRENGTH AND DURABILITY – AND THAT INCLUDES THE TAPES USED FOR ELECTRICAL AND MECHANICAL PROTECTION APPLICATIONS.

THAT’S WHY SHURTAPE, A COMPANY THAT’S BEEN DEDICATED TO CRAFTING HIGH PERFORMING AND INNOVATIVE TAPE SOLUTIONS SINCE 1955, IS EXPANDING ITS BUILDING AND CONSTRUCTION PORTFOLIO WITH A NEW LINE OF ELECTRICAL TAPES. WHETHER USED FOR PRIMARY INSULATION, AS A JACKETING OR FOR PHASING, THESE TAPES ARE ENGINEERED TO MEET – AND EXCEED – THE INDUSTRY’S EXPECTATIONS FOR QUALITY AND PERFORMANCE. SO YOU CAN BE CONFIDENT EVERY JOB, BIG OR SMALL, IS DONE RIGHT THE FIRST TIME.
