

SHURSEAL® PACKAGING SOLUTIONS

PRIME ALERT TAPE MONITORING SYSTEM

You know issues with case sealing equipment can bring packaging operations to a stand-still. In today's busy manufacturing world, there's just no time for downtime. It's why Shurtape offers the Prime Alert Tape Monitoring System – to give your manufacturing team more control on the line.

DETECT CASE SEALING FAULTS

PRIME ALERT TAPE MONITORING SYSTEM

An add-on feature to ShurSEAL® Packaging Solutions, Prime Alert is designed to issue audible and visual alerts to signal packaging line operators of following case sealing faults:

- Low tape
- Broken tape
- Case jam
- No tape
- Uncut tape

Prime Alert is available with an optional light tree installed, giving you the flexibility to maintain control of your packaging line, even when you can't be right there. Prime Alert can also be tied into your programmable logic controller (PLC) system to stop the case erector/sealer or conveyor before issues get out of hand, providing an extra check and balance on your end-of-line operations.

With Prime Alert in place, you can stop worrying about case seals and start putting your attention to other things.

PRIME ALERT 1

FOR LINES WITHOUT PLC SYSTEM

- Wireless, self-contained
- Battery-powered, self-recharging
- Water-resistant, making it capable of being washed down in sanitary and other like environments
- Easily retrofit to the ShurSEAL 7000 Series packaging solution

PRIME ALERT 2

FOR LINES WITH PLC SYSTEM

- Proximity sensing module can be mounted to the machine framing
- Wired directly to PLC – 24VDC
- Can be retrofit to ShurSEAL 7000 Series or 8000 Series/Quick Change packaging solutions
