

AGGRESSIVE HOLD, CLEAN REMOVAL

DS 154 DOUBLE-SIDED CONTAINMENT TAPE

Securing poly-sheeting can be time-consuming and expensive in terms of supplies and labor, especially when following traditional containment methods that require a two-step, two-tape process. But, this type of preparation is critical to a job well done. That's why Shurtape engineered DS 154 double-sided containment tape to cut steps, not corners – delivering trusted performance, while saving you time and money in restoration, abatement and remodeling projects.

DS 154 is a one tape, one step solution for creating high-performance containment systems for restoration, abatement and remodeling tasks such as painting, cleaning, sanding, mold remediation, asbestos removal and more. A premium grade painter's tape adhesive on one side allows for 21-day clean removal from a variety of surfaces without damage, while a heavy duty, aggressive adhesive on the other side securely holds poly-sheeting, tarps and other protective coverings. When the job is done, the tape and poly-sheeting remove cleanly and easily – in one step – to help you tackle each job with speed and ease.

AGGRESSIVE HOLD, CLEAN REMOVAL

DS 154 DOUBLE-SIDED CONTAINMENT TAPE

DS 154

Double-sided crepe paper tape used for creating high-performance containment systems.

- Excellent holding ability in both wet and dry environments
- Hand-tearable
- Conforms well to uneven surfaces
- Removes quickly and easily in a single step
- Differential adhesive system: premium grade painter's tape adhesive allows for 21-day clean removal from surfaces without damage; aggressive adhesive holds securely to poly-sheeting, tarps and other protective coverings
