

HIGH PERFORMANCE IN FRIGID CONDITIONS

COLD TEMPERATURE CARTON SEALING TAPES

You expect that your carton sealing tape will perform reliably and maintain its hold – even in harsh, cold conditions. It's why Shurtape® offers carton sealing tapes specifically formulated for high performance in frigid environments. So, you get the strong hold you need, without lowering your expectations for product performance just because the temperature drops.

Shurtape cold temperature carton sealing tapes are designed to provide an instant, permanent bond for light- to medium-weight cartons. Our HP Series cold temperature tapes offer an easy-release formula that won't slow you down in high-speed applications; while our AP Series cold temperature tapes make quick work of sealing cartons in manual packaging applications.

Shurtape cold temperature tapes are ideal for applications where the packaging environment falls below 35 F: frozen foods, meat and poultry processing, dairy facilities, and unheated warehouses and storage facilities in cold weather climates.

HIGH PERFORMANCE IN FRIGID CONDITIONS

COLD TEMPERATURE CARTON SEALING TAPES

HP 132°

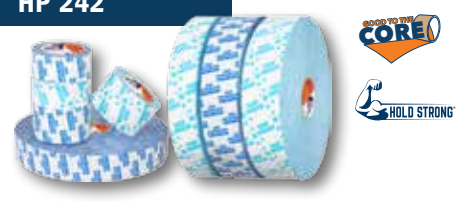

1.6 mil cold environment hot melt packaging tape for manual or automated industrial sealing of lightweight cartons in environments such as food processing and packaging facilities, as well as in cold weather moving/storage and unheated warehouses.

HP 232°

1.9 mil cold environment, production grade hot melt packaging tape for sealing medium-weight cartons in cold temperature environments, such as food processing and packaging facilities, as well as in cold weather moving/storage and unheated warehouses in cold climates.

HP 242

1.9 mil cold environment, production grade, hot melt packaging tape for sealing medium-weight cartons in cold temperature environments. Standard printed – available in “Keep Frozen” and “Keep Refrigerated” messaging – to prevent pilferage and inform handlers of care.

AP 180°

1.8 mil production grade acrylic packaging tape for manual and automated industrial sealing of lightweight cartons AP 180° is constructed with a high-quality adhesive that provides clarity, UV resistance, premium aging characteristics and low odor for a variety of carton sealing applications.

AP 201°

2.0 mil production grade acrylic packaging tape for light- to medium-weight carton sealing in manual and automated industrial sealing applications. AP 201° delivers clarity, UV resistance, premium aging characteristics and low odor.

TECHNICAL SPECIFICATIONS

		Tensile	Adhesion to Stainless Steel	Thickness	Elongation	Service Temperature Range	Application Temperature Range
HP 132°	Cold environment hot melt packaging tape for lightweight carton sealing.	21 lbs/in width	30 oz/in width	1.6 mils	150%	-20 - 100 F	20 - 75 F
HP 232°	Cold environment, production grade hot melt packaging tape for sealing medium-weight cartons.	27 lbs/in width	30 oz/in width	1.9 mils	150%	-20 - 100 F	20 - 75 F
HP 242	“Keep Frozen” and “Keep Refrigerated” standard printed, cold environment, production grade hot melt packaging tape for sealing medium-weight cartons.	27 lbs/in width	30 oz/in width	1.9 mils	150%	-20 - 100 F	20 - 75 F
AP 180°	Production grade acrylic packaging tape for lightweight cartons.	20 lbs/in width	21 oz/in width	1.8 mils	150%	-20 - 180 F	20 - 110 F
AP 201°	Production grade acrylic packaging tape for light- to medium-weight cartons.	24 lbs/in width	22 oz/in width	2 mils	150%	-20 - 180 F	20 - 110 F

For heavy duty cold temperature applications, use AP 301° or AP 401°
