CURBSIDE RECYCLABLE PAPER PACKAGING TAPE

From minimizing greenhouse gases to reducing material waste, more and more global corporations are looking for ways to make a positive impact on the environment – and packaging continues to be a large part of that conversation. Oftentimes, however, corporations are forced to choose between going “green” and product performance.

But, with new CR 400 paper packaging tape from Shurtape®, choosing a sustainable solution doesn't have to mean sacrificing case sealing performance.

CR 400 is a performance grade curbside recyclable paper packaging tape that delivers:

- **SECURE SEALS:** With excellent quick stick and high holding power, CR 400 delivers on the same quality, durability and reliability demanded of Shurtape packaging solutions (even when used on highly recycled cartons)
- **VERSATILITY:** CR 400 can be used in both manual and automated carton sealing applications, including adhering to hard-to-stick-to and highly recycled cartons
- **RECYCLING EASE:** CR 400 can be recycled right on the box* – no need to remove the tape before it is sent to the recycling center
